Stronger together

How Austrian Technical Universities benefit
from European University Alliances

European University Alliances foster connections between universities to promote joint strategies in education and research. Austria's three Universities of Technology, united nationally under the TU Austria network, each play a vital role in different European alliances, embodying their shared motto: "Stronger together"

We warmly invite you to learn more about strategic priorities of the TU Austria Universities and to explore their experiences, challenges and successes within the alliances. Together with experts from the European Commission the future needs of European University Alliances will be discussed with a focus on enhancing their impact and competitiveness.

Moderation

Andrea Höglinger Vice Rector Research of Graz University of Technology

Susanne Feiel Head of Department International Relations and European University, Montanuniversität Leoben

5 pm
